## Angus & Maine Anjou

**Lazy H Farm 6th Annual Silent Auction Bull Sale.**

**April 1, 2010 2:00 - 4:00 pm**

**At the Farm**, 10 miles south of Maymont or 3 miles north of Sonningdale on Hwy 376

Purchasing seedstock is an important and lasting decision for cow/calf producers that affects the profitability of a herd for years. At an auction sale there's only a few seconds to make a very big purchase that can impact your herd and your bottom line. Here you can take your time in making your decision.

The silent auction offers the buyers a **no pressure** bull sale. Look the bulls over, have some lunch, visit with other cattlemen. Make the **right** decision for your cow herd.

Phone: 306-237-9581 EMAIL: [lazy\\_hfarm@sasktel.net](mailto:lazy_hfarm@sasktel.net)

**W**elcome to the Lazy H. Please accept this as your personal invitation to join us on April 1, for some lunch and refreshments. We look forward to seeing you. We greatly appreciate your attendance at our sale and your interest in our cattle. We take a lot of pride in the fact that 90 % of our bulls sell to repeat customers. You can't get a much better endorsement than that. Many thanks to all our customers for investing and believing in our program, and a warm welcome to those of you who may be planning on attending for the first time.

Our program is built around the philosophy of raising top quality Angus and Maine-Anjou seed stock. We strive for cattle that have **width between the pins, a wide deep quarter, wide tops, depth of body, volume, clean fronts, structurally sound, and are easy fleshing, easy doing.** The cow herd is built around cow families that are very productive through adding longevity and **performance** to their calf crop.

We believe the opportunity to view the bulls in the pens near the sale barn, where they are comfortable and you can move them around, serves our buyers well. As you evaluate this exciting group of bulls that have, hair, muscle and width, you will notice how docile they are. Every time our Granddaughter comes to our house she insisted on helping with chores

Our 2 1/2 yr old Granddaughter Darbi, helping papa feed the bulls

Take notice of the "Profitmaker" bulls, these 1/4, 3/8, 1/2, 5/8, and 3/4 Angus/Maine bulls are pretty impressive. Use them and the results should be outstanding. Just ask Ron & Catherine Parker.

The bulls have been developed on a high roughage ration along with a mixture of 1/2 oats/1/2 malt sprout pellets at a rate of 1.25% of their body weight.

#### **Keep & Feed Program:**

Bulls will be kept at the farm until the end of April. If you do not need the bull until later or it is inconvenient for you to have the bull at your place, we will keep your bull under the same good management and care as he was receiving before the sale. He will be developed the same as we do our own for **\$2.00/day from May 1st until you need him**, payable sale day. The bull development fee will be **waived** on bulls selling over \$2500.00. Bulls left at Lazy H Farm after May 1 will be at **owners own risk**. We strongly **encourage** you to **insure** your bull.

**Free delivery** up to 100 miles on bulls selling over \$2500.00 Bulls selling for less than \$2500.00 will be delivered at cost, payable sale day.

Bulls will be vet inspected and semen-tested prior to delivery. This will give you a more accurate and current report before the bull sees pasture service.

We just like the way this bull is made. We like his numbers and performance. He is a big growthy bull, straight lines, smooth, long spined, deep sided, high volume, deep quarter, good hair coat, small head, trim fronted, big testicles, eye appealing, just a complete package. Out of 25381 angus calves Wells-Fargo 96 W is in the **top 29% for Yearling Weight**, **top 2% for Maternal Calving Ease (MCE)** and **top 7% for Stayability** (daughters will stay in herd till at least 6 yrs of age).

- Out of 27,198 registered Angus cows his mother is in the **top 16% for Maternal Calving Ease**. She is a Long smooth feminine cow and still has a great udder. Her sons have sold to Parkerbuilt Land & Cattle and a full brother to Wells-Fargo sold to Gary Salisbury in our 2009 sale.

Wells-Fargo's mother, Lazy H Tibbie Joy 96 J

Scrotal Circ	34 cm
Age of Dam	7

- Lazy H Net Worth 77 W is moderate framed, deep sided bull who has a straight back, depth of quarter, lots of hair, a tight sheath and a small head. Out of 27,863 black angus calves he is in the top 13% for Milk, top 29% for Total Maternal and 9% for Scrotal Circ.
- Sired by Net Worth one of the most heavily used Angus bulls in the world. Net Worth had a 205 day weight of 995 lbs, a 365 day weight of 1573 lbs and a 17.2 REA.. He sires calves that are moderate, stout made, with muscle, volume lots of performance and a ton of hip. He is in the top 1% for Milk & TM, 2% for Y W & YG, 5% for WW & Rib Eye, 12% for Marbling, and 20% for Scrotal Circ. He has 5695 registered Progeny.
- His **mother** is moderate in height, deep quartered and very feminine. Her sons have sold to Graham Taylor, Marvin Fouhy and Kevin Domashovitz.

BW	WW	YW	Milk	Total Maternal	Yearling Gain
+3.8	+38	+74	+22	+41	+37
5	5	5	5		5

**B**ulls have the greatest economic impact on any breeding program, thus bull selection is one of the most important decisions and investments that a cowman makes. A bull sires 20 to 40 calves each year while a cow produces 10 or less in her lifetime. For the most part, herd improvement comes from the bulls. It has been estimated that 80% of herd improvement is directly attributed to the bull. The sire and dam each contribute 50% of genetics to the calf. Half of the dam's contribution comes from her sire and a quarter comes from her dam sire. Thus 87.5% of a calf's genetic makeup comes from bulls brought into the herd. So your decisions do affect the quality of your herd and buyer acceptance of your calves and thus your bottom-line.

The feedlots and packers are wanting black hided calves for their branded beef programs. When feed prices are high, feed efficiency becomes more economically important. In fact, feed conversion can mean a profit differences of up to \$100/head on feedlot cattle (Dr. Koe Jim). With the Angus marbling and the Maine feed efficiency and carcass yield, more and more feedlots and packers are paying a premium for good thick topped calves.

- What a stacked performance pedigree! Woodhill Graphite, Fullback and GDAR Executive 727. Utah has a wide deep quarter, depth of body, straight top line, wide base, length, and is easy fleshing.
- His mother is a typical Fullback daughter, deep & thick, a good mother with lots of milk. She has raised us 3 bulls, her first calf sold to Murray Fouhy in 2006, her second sold to John Beckton and Utah 42 U is the third bull she has raised.

- This is a really good Red Angus Bull. He has good numbers, A smooth shoulder with a **wide straight back**, a **wide quarter**, **deep twist**, **deep body**, excellent hair coat & **easy fleshing**. He should be going into a Purebred herd. Out of 26,480 red angus calves Unforgiven 10 U is in the **top 3% for Yearling Weight**, **top 10% for Weaning Weight**, **2% for HPG**, (Heifer Pregnancy—the probability in daughters ability to conceive and calve as a two year old), and **top 12% for Total Maternal**.
- Out of 27,892 registered Red Angus cows his mother is in the **top 11% for Weaning Weight** and **top 27% for Yearling weight**. She is a long smooth feminine cow.
